

Znak it ! Worldwide network of Znak it Centers

By 2012, Znak it! plans to establish 20+ local but inter-connected centers, offering Znak it! services, both as a payment system & content portals

Each center operates on a semi-independent (franchise-like) basis, using Znak it! technology and marketing support. The centers exchange content (80% is local in local languages; 20%, global) and thus serve as content marketplace and syndication opportunity for content providers worldwide. **If you are interested in organizing and running an international Znak it! hub near you, please contact us at info@znak-it.com**
